Liza Konovalova

Middle+ UI/UX Designer | UI Design Engineer

Kyiv, Ukraine | +380 93 262 36 36 | bet.konovalova@gmail.com | Telegram | LinkedIn | Portfolio

SUMMARY

Middle+ UI/UX Designer with **5 years in enterprise B2B SaaS**, focused on **data-heavy products**: dashboards, analytics tools, and complex workflows. At Trinetix, grew from Junior to Middle+ and designed **10+ products** from discovery to post-launch, with audiences from 100 to 2,000+ users. Most recently worked as a **UI Design Engineer**, taking products from research to a working coded build with **Claude Code** and cutting concept-to-prototype time from **2 months to 2 weeks**. Strong in **design systems**, **usability testing**, and close collaboration with developers.

EXPERIENCE

Trinetix | Kyiv, Ukraine

UI Design Engineer (official title: AI Product Owner) — May 2026 – Aug 2026

- Built products end to end with Claude Code, from research and UX flows to UI and a working coded product.
- Introduced Claude, Claude Code, and ChatGPT into the design workflow, making concept-to-prototype work about 4x faster, so teams tested ideas with users and stakeholders before committing development budget.
- Led scoping with clients and business owners, narrowing about 10 proposed features to 5 core MVP features and saving about 2 weeks of delivery time.
- Delivered an airport navigation concept (NDA) and konovalova.store, both built entirely with Claude Code.

UI/UX Designer, Junior → Middle+ — Aug 2021 – Apr 2026

- Grew from Junior to Middle+, moving from UI execution to owning design end to end and leading client communication in English.
- Designed 10+ enterprise B2B products (data operations, cloud cost, tax analytics, recruiting) used by 100 to 2,000+ users, from discovery through post-launch iteration.
- Ran 20+ moderated usability tests across products, plus stakeholder interviews, discovery workshops, and competitive analysis, to validate design decisions before development.
- Built and maintained Figma design systems and reusable component libraries with variables, components, and auto layout.

Mate Academy | Kyiv, Ukraine

Education Mentor — Nov 2022 – May 2023

- Mentored aspiring designers through design reviews, helping 25+ students land their first design roles.

SKILLS

UX & Research	UX Research, Usability Testing, Information Architecture, User Flows, Wireframing, Prototyping, Interaction Design
UI & Systems	Design Systems, Complex Data Interfaces, Dashboard Design, Data Visualization, Responsive Design, Accessibility (WCAG)
Product	Product Discovery, Stakeholder Workshops, Competitive Analysis
AI	AI Prototyping, Claude Code, Prompt Engineering, AI Image & Video Generation
Tools	Figma (Variables, Auto Layout, Components), ClickUp, HTML/CSS (basic)
Languages	Ukrainian (Native), English (B2)

EDUCATION

UX/UI Design Course, Mate Academy — Mar 2021 – Aug 2021
